

The Timeless Elegance
of Bamina Jewelry

Gold Vermeil Jewellery

<https://bamina.co/>

What is Gold Vermeil?

Gold Vermeil consists of a base metal onto which a layer of Gold is placed. We start off with Sterling Silver as the base metal, then the Gold (18ct. as a max) is applied through electroplating it onto the Sterling silver base, which results in them fusing together. The Gold layer has to be at least 2.5 Microns thick, which provides us with a luxury product made of a real gold layer.
